BRT-028	NIN verification blocks progress	High	Dashboard	Not retested
BRT-029	Deleted bank account still appears on Withdraw Funds	High	Dashboard	Not retested
BRT-033	Grey screen when the new State has fewer LGAs than the selected City's list position	High	Signup	New
BRT-036	Advertiser Details has no client-side validation (phone, website URL, empty City)	High	Signup	New
BRT-045	Selecting FCT as State always crashes to a grey screen	High	Signup	New
BRT-046	Changing State silently selects a different LGA at the same list position	High	Signup	New
BRT-047	Password strength is not enforced	High	Signup	New
BRT-021	Messages show conversations on an account that never chatted	Medium	Dashboard	Not retested
BRT-022	Bank name is a free-text field	Medium	Dashboard	Not retested
BRT-023	Help does not work	Medium	Dashboard	Not retested
BRT-027	Dashboard analytics show incorrect figures	Medium	Dashboard	Not retested
BRT-037	City/LGA dropdown out of sync: blank menu, overlapping text	Medium	Signup	New
BRT-038	ID Type, ID Number and TIN accept any text	Medium	Signup	New
BRT-039	Company Advertiser has to enter the same details twice	Medium	Signup	New

BRT-013	"Request successful" toast appears late, on the login screen	Low	Registration	Not retested
BRT-024	Session persists after the app is swiped away	Low	Dashboard	Not retested

BRT-030

No SSL certificate pinning

Critical P0 Not retested

Area	Security	Role	All
Reported	2026-09-29	Status	Open
Preconditions	Rooted device or proxy setup (reFlutter + Burp Suite).		

STEPS TO REPRODUCE

1. Patch the APK with reFlutter.
2. Route device traffic through Burp Suite.
3. Log in and make a payment.

EXPECTED

Connections to api.syroltech.com and api.paystack.co fail unless the pinned certificate/public key matches.

ACTUAL

Traffic, including auth tokens and payment data, can be intercepted and read in plain text.

Notes / root cause: Search the Flutter code for HttpClient(, Dio(, http.Client(), SecurityContext. Remove any badCertificateCallback that returns true. Applies to both APKs (Brantro_user.apk and Brantro_business.apk); listed on both sheets.

BRT-031

Advertiser signup rejected: backend has no ADVERTISER role

Critical | P0 | New this round

Area	Signup	Role	Advertiser - Individual; Advertiser - Company
Reported	2026-10-07	Status	Open
Preconditions	Brantro Business app; on Create account.		

STEPS TO REPRODUCE

1. Open Account > Advertiser.
2. Company: fill Advertiser Details > Complete Registration > Account Details Step 1 and 2 > Create Account.
3. Individual: fill Advertiser Details > Complete Registration.

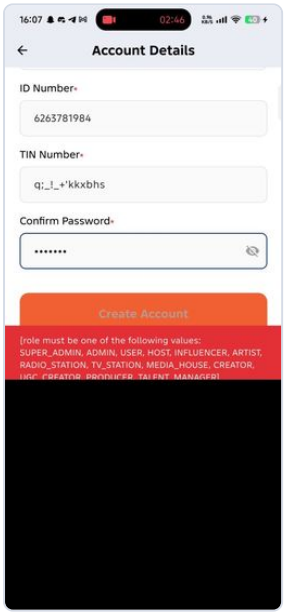

EXPECTED

Advertiser account is created.

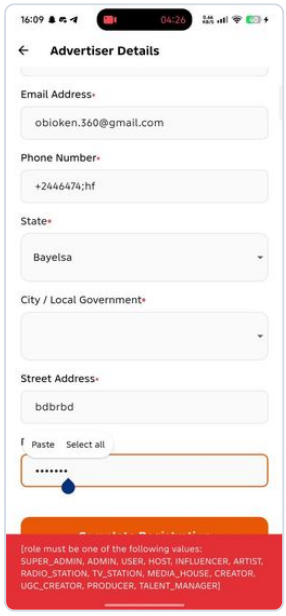

ACTUAL

Red banner: "[role must be one of the following values: SUPER_ADMIN, ADMIN, USER, HOST, INFLUENCER, ARTIST, RADIO_STATION, TV_STATION, MEDIA_HOUSE, CREATOR, UGC_CREATOR, PRODUCER, TALENT_MANAGER]". Failed 4 times (Company and Individual). No Advertiser account can be created.

Notes / root cause: Blocker. ADVERTISER (and DESIGNER) are missing from the backend role enum. Align the role values the app sends with the backend enum, and show a readable error. Screen recording 2:47-4:28.

Recording V07: role enum error company 165s

Recording V15: role enum error individual 264s

BRT-032

Signup error lists SUPER_ADMIN / ADMIN as accepted roles (possible privilege escalation)

Critical P0 New this round

Area	Security	Role	All
Reported	2026-10-07	Status	Open
Preconditions	Dev API; signup request captured in a proxy (e.g. Burp).		

STEPS TO REPRODUCE

1. Capture the signup request.
2. Change role to "SUPER_ADMIN", then "ADMIN", and resend.
3. Log in with the new account and call an admin endpoint.

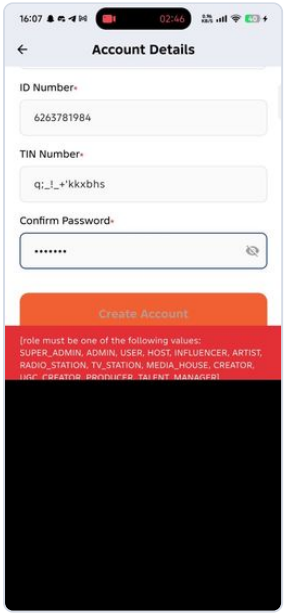

EXPECTED

Server ignores a client-sent role, or accepts only self-registrable roles. Admin roles can only be granted from the admin panel.

ACTUAL

Not yet verified. The public signup error lists SUPER_ADMIN and ADMIN as valid values for the role field.

Notes / root cause: Needs verification on dev. The backend is shared, so this affects both apps. Error messages should not list internal roles.

Recording V07: role enum error company 165s

BRT-025

Template Category dropdown has no options

High | P1 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in; on Upload Templates.		

STEPS TO REPRODUCE

1. Open Upload Templates.
2. Tap Template Category.

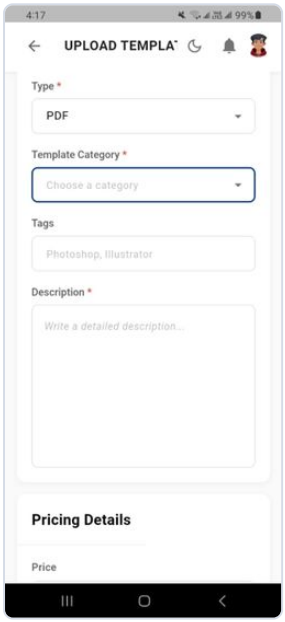

EXPECTED

A list of categories appears.

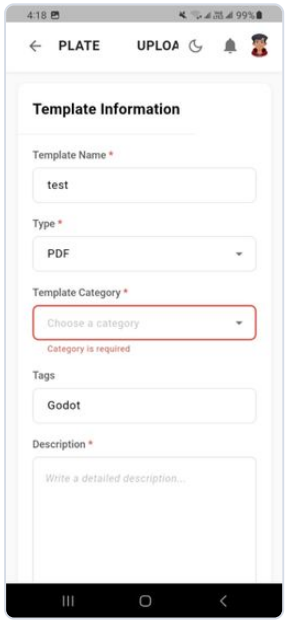

ACTUAL

Dropdown is empty, so the template can't be uploaded.

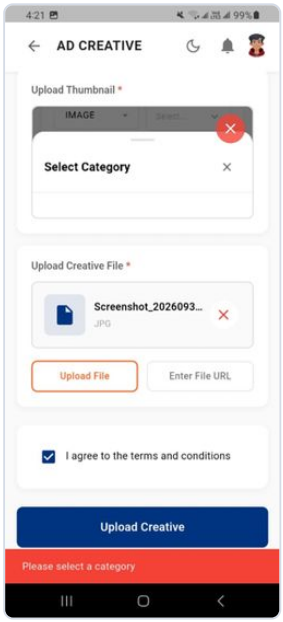

Notes / root cause: Dev: categories must be added from admin. Suggest seeding defaults or showing a message when none exist.

BRT-026

Create announcement does not create anything

High | P1 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in.		

STEPS TO REPRODUCE

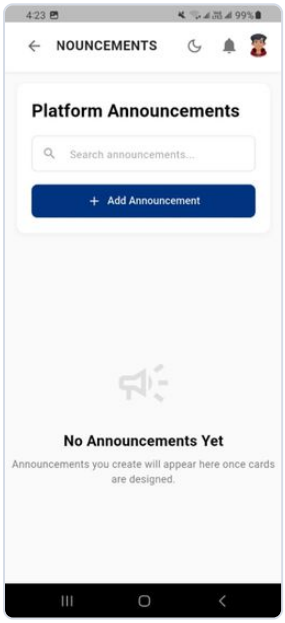

1. Dashboard > Announcements.
2. Tap Add Announcement.
3. Fill in the form and tap Create.

EXPECTED

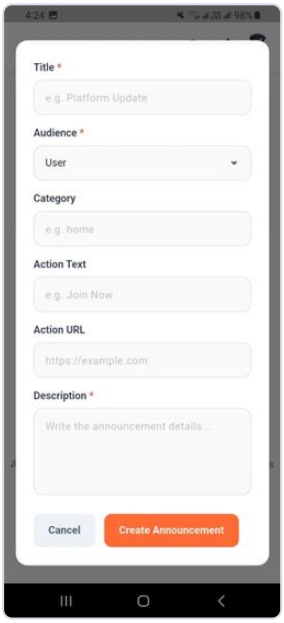

New announcement appears in the list.

ACTUAL

Nothing is created; list still shows "No Announcements Yet".

Tester screenshot

Tester screenshot

BRT-028

NIN verification blocks progress

High | P1 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in; going through account verification.		

STEPS TO REPRODUCE

1. Start account verification.
2. Observe the required documents.

EXPECTED

No NIN/BVN required (as previously agreed), or an alternative verification option.

ACTUAL

NIN is required and the user cannot continue.

BRT-029

Deleted bank account still appears on Withdraw Funds

High | P1 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in with one withdrawal account added.		

STEPS TO REPRODUCE

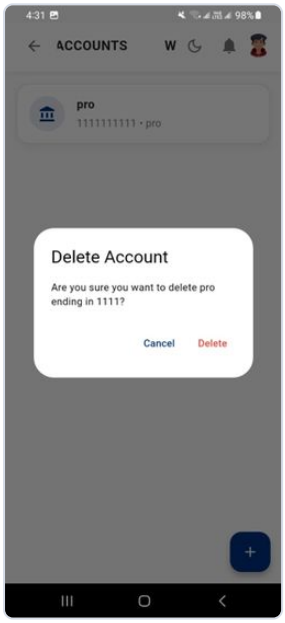

1. Wallet > Withdrawal Accounts.
2. Delete the account (e.g. "pro" ending 1111) and confirm.
3. Open Withdraw Funds.

EXPECTED

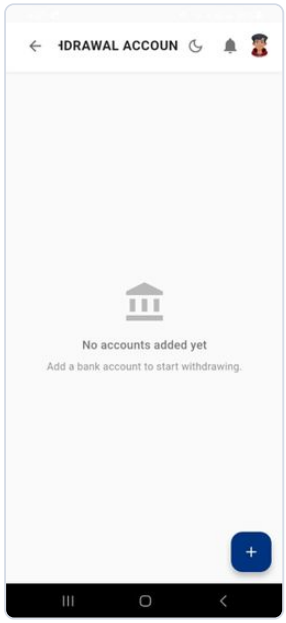

Deleted account is removed everywhere.

ACTUAL

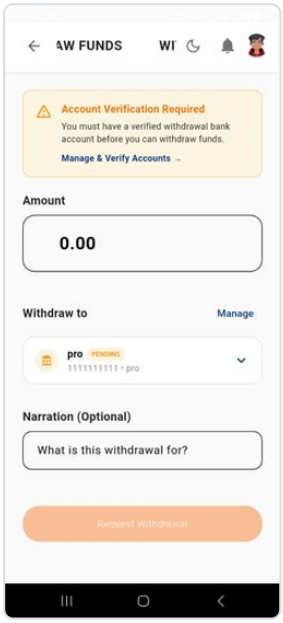

Withdrawal Accounts shows "No accounts added yet", but Withdraw Funds still lists "pro - 1111111111 (Pending)".

BRT-033

Grey screen when the new State has fewer LGAs than the selected City's list position

High P1 New this round

Area	Signup	Role	Advertiser - Individual
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details.		

STEPS TO REPRODUCE

1. State = Borno; City = Jere (position 13 of 27).
2. Change State to Bayelsa (only 8 LGAs).
3. Observe the screen; then press Back.

EXPECTED

City resets to empty and Bayelsa's LGAs are listed.

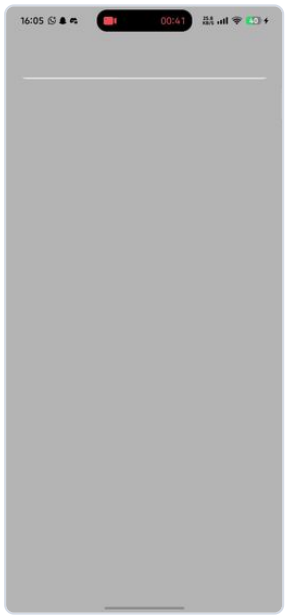

ACTUAL

The whole screen turns grey (app crash, empty widget tree). Back returns to the role picker and every entered field is lost.

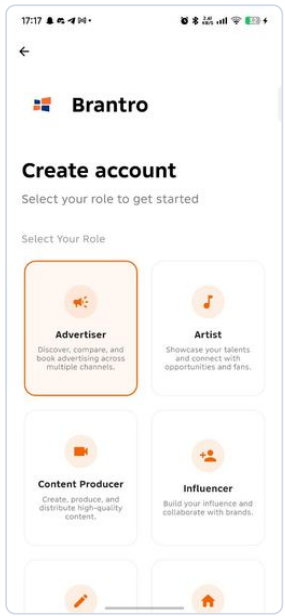

Notes / root cause: Root cause (confirmed on device 7 Oct, Infinix X6887): City is stored as a list POSITION, not a value. On State change the old position is looked up in the new state's list; when the new list is shorter the lookup fails (index out of range) and Flutter shows its grey error screen. When the new list is longer, a wrong LGA is silently selected instead (BRT-046). Fix: store the LGA name/id, clear City on State change, key the dropdown by State. Customer app: BRT-042.

Recording V13: grey after state change 241s

Recording V01b: grey screen after state 40s

Device test D5: back to roles data lost

BRT-036

Advertiser Details has no client-side validation (phone, website URL, empty City)

High | P1 | New this round

Area	Signup	Role	Advertiser - Individual; Advertiser - Company
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details.		

STEPS TO REPRODUCE

1. Enter Phone "+2446474;hf", Business Telephone "bkjdbf", Website "hjx".
2. Leave City / Local Government empty.
3. Tap Complete Registration.

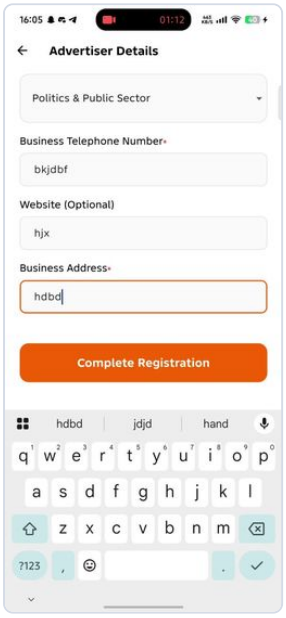

EXPECTED

Each invalid or empty required field is highlighted and submission is blocked.

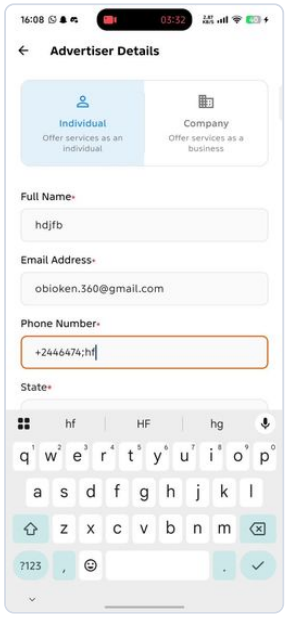

ACTUAL

The form submits to the backend with letters in the phone number and an empty City. Only backend errors appear.

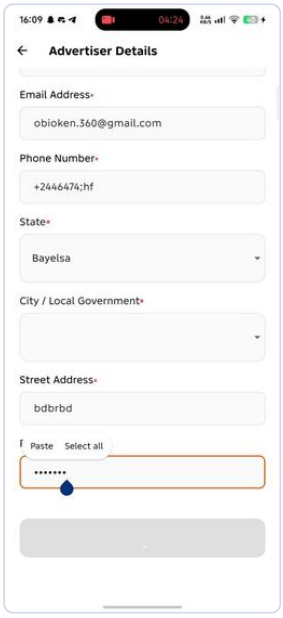

Notes / root cause: Account Details Step 1 already uses a fixed +234 phone field; reuse it here. Same bug in the Customer app: BRT-043.

Recording V03: company fields no validation 70s

Recording V09: phone accepts letters 210s

Recording V14: submits with empty city 262s

BRT-045

Selecting FCT as State always crashes to a grey screen

High | P1 | New this round

Area	Signup	Role	Advertiser - Individual
Reported	2026-10-07	Status	Open
Preconditions	Fresh Advertiser Details form, no City selected.		

STEPS TO REPRODUCE

1. Create account > Advertiser.
2. Tap State and select FCT.

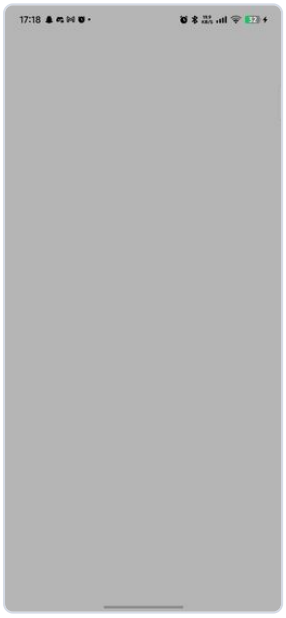

EXPECTED

FCT's area councils (Abaji, Bwari, Gwagwalada, Kuje, Kwali, AMAC) load in City / Local Government.

ACTUAL

The screen turns grey immediately, even with no City selected. Back returns to the role picker. Reproduced on device 3 times (fresh form, and after Borno > Shani).

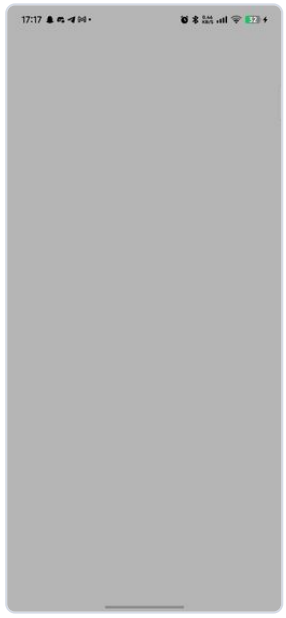

Notes / root cause: Separate from BRT-033: FCT fails on its own, so its LGA data is most likely missing or keyed differently (e.g. 'FCT' vs 'Federal Capital Territory'). Users in Abuja cannot sign up. Customer app shows the same (BRT-042).

Device test D6: fct fresh form grey

Device test D3: borno shani pos27

Device test D4: grey after fct

BRT-046

Changing State silently selects a different LGA at the same list position

High | P1 | New this round

Area	Signup	Role	Advertiser - Individual
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details.		

STEPS TO REPRODUCE

1. State = Benue; City = Vandeikya (position 23 of 23).
2. Change State to Borno (27 LGAs).
3. Read the City field.

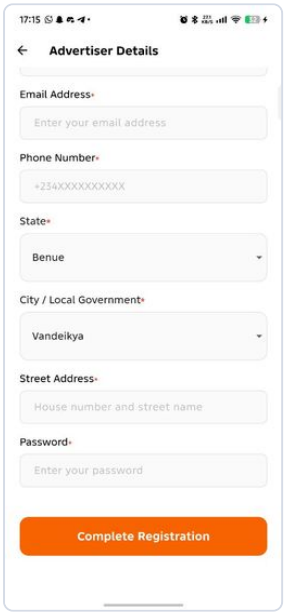

EXPECTED

City is cleared and the user must pick a Borno LGA.

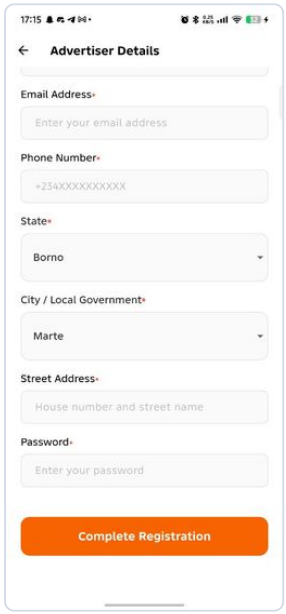

ACTUAL

City now shows 'Marte', which the user never chose. Marte is position 23 in Borno's list. The wrong LGA would be saved to the profile without the user noticing.

Notes / root cause: Verified on device 7 Oct. Same root cause as BRT-033 (City stored as a position). Data-integrity risk: wrong location on advertiser profiles.

Device test D1: benue vandeikya pos23

Device test D2: borno auto marte pos23

BRT-047

Password strength is not enforced

High | P1 | New this round

Area	Signup	Role	Advertiser - Individual; Advertiser - Company
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details / Account Details Step 2.		

STEPS TO REPRODUCE

1. Fill the form.
2. Enter a weak password such as "aaaaaa" or ".".
3. Submit.

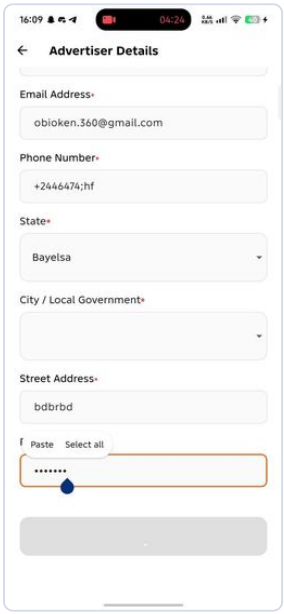

EXPECTED

Minimum length plus letters, numbers and a special character, with the rules shown under the field.

ACTUAL

No password rules are shown and no strength check runs on the form. In the Customer app a 1-character password (".") produced only an email error from the backend, so the backend has no password rule either.

Notes / root cause: Reported by QA lead (Business app). Same defect in the Customer app: BRT-005. Not re-checked on the device with a weak value because sign-up is blocked by BRT-031.

Recording V14: submits with empty city 262s

BRT-021

Messages show conversations on an account that never chatted

Medium | P2 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Newly created account with no chats.		

STEPS TO REPRODUCE

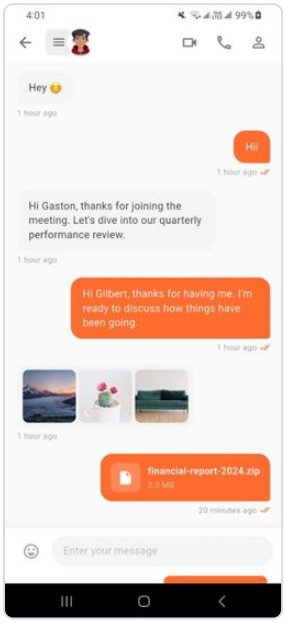

1. Log in with a new account.
2. Open profile menu > Messages.

EXPECTED

Empty state until a real conversation exists.

ACTUAL

Messages are listed even though the user never chatted.

Tester screenshot

BRT-022

Bank name is a free-text field

Medium | P2 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in; adding a withdrawal account.		

STEPS TO REPRODUCE

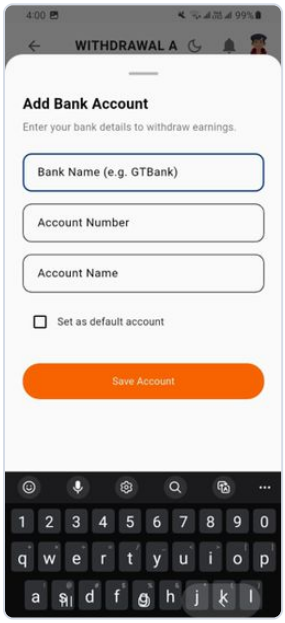

1. Go to Wallet > Withdrawal Accounts > +.
2. Look at the Bank Name field.

EXPECTED

Dropdown of banks; ideally the account name resolves from bank + account number.

ACTUAL

Bank name must be typed by hand, so typos are likely.

Tester screenshot

BRT-023

Help does not work

Medium | P2 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in.		

STEPS TO REPRODUCE

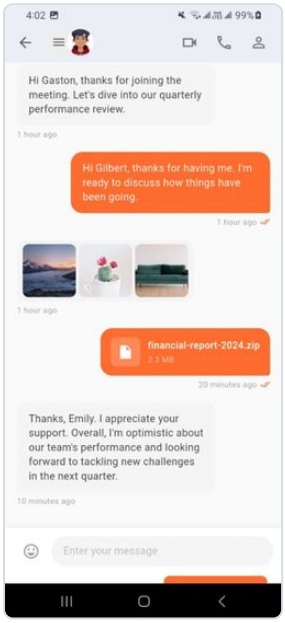

1. Open Dashboard.
2. Tap profile avatar > Help.

EXPECTED

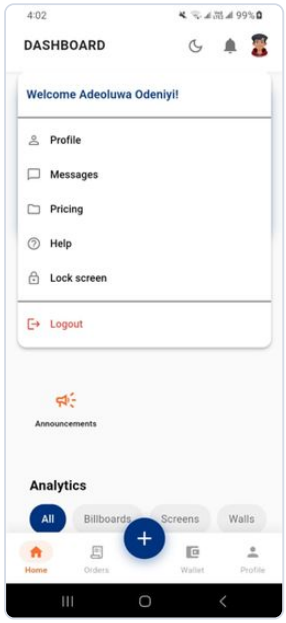

Opens a help/FAQ page or support contact.

ACTUAL

Help does not work.

Tester screenshot

Tester screenshot

BRT-027

Dashboard analytics show incorrect figures

Medium | P2 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in with a new account.		

STEPS TO REPRODUCE

1. Open Dashboard.
2. Scroll to Analytics.

EXPECTED

Figures match real activity (zero for a new account).

ACTUAL

Analytics figures are incorrect.

Tester screenshot

BRT-037

City/LGA dropdown out of sync: blank menu, overlapping text

Medium | P2 | New this round

Area	Signup	Role	Advertiser - Individual
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details.		

STEPS TO REPRODUCE

1. Change State several times.
2. Open City / Local Government.

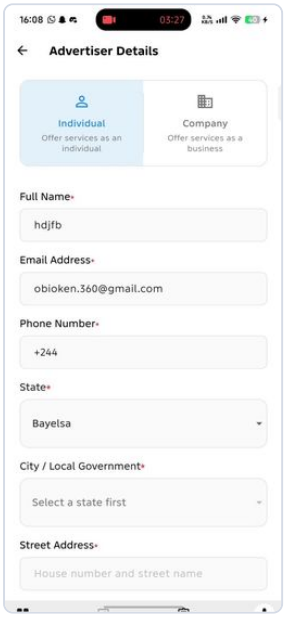

EXPECTED

City list matches the selected state and renders normally.

ACTUAL

City shows "Select a state first" while Bayelsa is selected. The dropdown opens as a blank white sheet with one item. The City field shows "Ondo" and "Idanre" on top of each other.

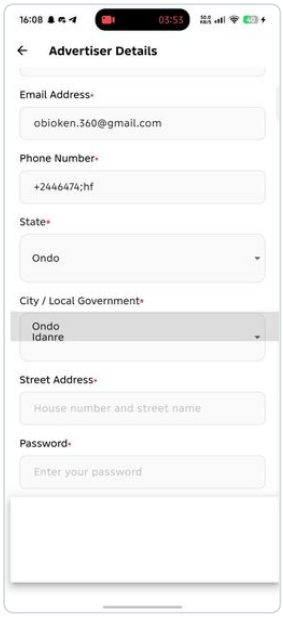

Notes / root cause: Same root cause as BRT-033; fix together.

Recording V08: city says select state first 206s

Recording V11: blank dropdown menu 228s

Recording V12: overlapping city text 232s

BRT-038

ID Type, ID Number and TIN accept any text

Medium | P2 | New this round

Area	Signup	Role	Advertiser - Company
Reported	2026-10-07	Status	Open
Preconditions	On Account Details - Step 2 of 2.		

STEPS TO REPRODUCE

1. ID Type (Optional): "134527462fgh".
2. TIN Number: "q;_!_+'kkxbhs".
3. Tap Create Account.

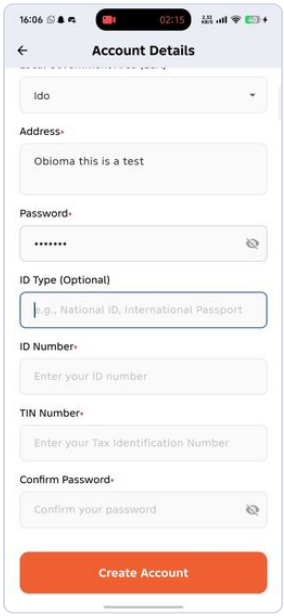

EXPECTED

ID Type is a dropdown. ID Number is required only when an ID Type is chosen, and is validated for that type. TIN is digits only.

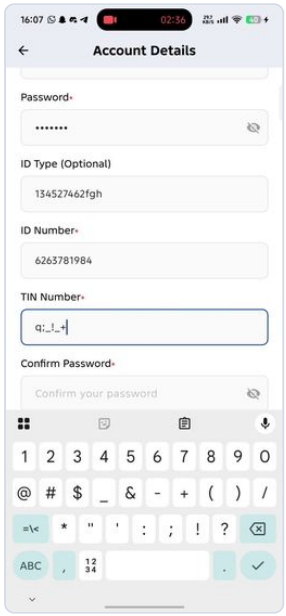

ACTUAL

All values are accepted. ID Number is required even though ID Type is optional.

Notes / root cause: Same issue in the Customer app (Content Producer - Business): BRT-044.

Recording V05: step2 asks ID and TIN again 133s

Recording V06: TIN accepts symbols 155s

BRT-039

Company Advertiser has to enter the same details twice

Medium | P2 | New this round

Area	Signup	Role	Advertiser - Company
Reported	2026-10-07	Status	Open
Preconditions	On Advertiser Details (Company).		

STEPS TO REPRODUCE

1. Fill Advertiser Details including TIN, Business Telephone and Business Address.
2. Tap Complete Registration.

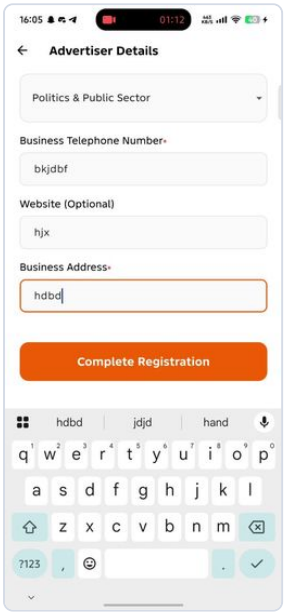

EXPECTED

Entered data carries over; one continuous flow with one step counter.

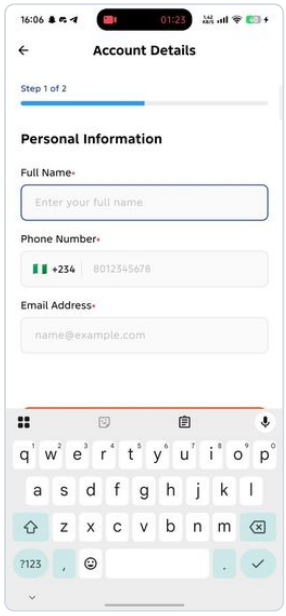

ACTUAL

Opens Account Details "Step 1 of 2", which asks for Full Name, Phone and Email, then Country/State/LGA/Address, ID and TIN again.

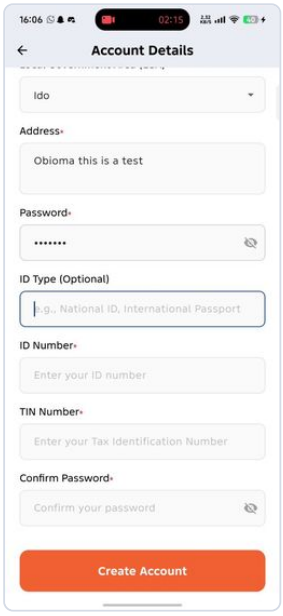

Notes / root cause: UX: drop the repeated TIN and address fields.

Recording V03: company fields no validation 70s

Recording V04: company then account details step1 81s

Recording V05: step2 asks ID and TIN again 133s

BRT-013

"Request successful" toast appears late, on the login screen

Low | P3 | Not retested

Area	Registration	Role	Content Producer - Business
Reported	2026-10-01	Status	Open
Preconditions	Completed signup.		

STEPS TO REPRODUCE

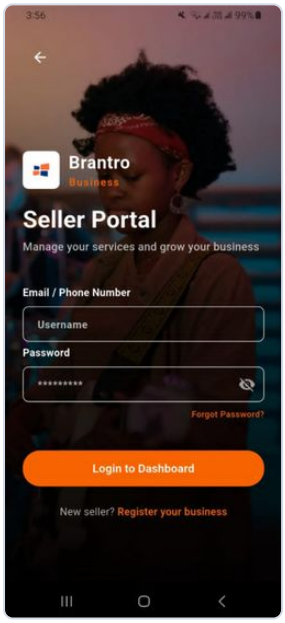

1. Complete registration.
2. Watch the screen after tapping Create Account.

EXPECTED

Confirmation is shown on the signup screen, then the user is taken to login.

ACTUAL

"Request successful" appears at the bottom of the Seller Portal login screen after signup has already finished.

Tester screenshot

BRT-024

Session persists after the app is swiped away

Low | P3 | Not retested

Area	Dashboard	Role	Signed-in user
Reported	2026-10-01	Status	Open
Preconditions	Signed in.		

STEPS TO REPRODUCE

1. Log in.
2. Swipe the app away from recent apps.
3. Reopen the app.

EXPECTED

Confirm intended behaviour. If sessions persist, require the lock screen/PIN on reopen.

ACTUAL

User is still logged in with no prompt.

Notes / root cause: May be by design; needs product decision.
